

urbaniture

Urban Furniture, Redefined.

PORTFOLIO 2026 · BASEL, SWITZERLAND

STUDIO

Urbaniture is a Basel-based urban furniture design studio — the design partner for forward-thinking cities and the architects, developers and manufacturers who shape them.

People first

Urban furniture for often-overlooked user groups — children, young people and caregivers — so they can take a more active part in urban life.

Resilience

Disaster-responsive furniture that serves the street every day and is designed to support shelter, storage or work when the city needs it.

Modular systems

Families of components that grow, shrink and change function on site — from seating with integrated bicycle parking to expandable kiosks.

Design lead

Mustafa Emre Gözleveli — Urban Planning (METU) and Industrial Product Design (ITU). Based in Basel.

DESIGN LEAD'S TRACK RECORD

23
years of practice in urban furniture and public space

100+
urban furniture designs, most produced and installed

13
years at İSTON, Istanbul's municipal urban furniture company

29	Bike Rack	Concept developed at İSTON
30	Bike Rack — Table	Concept developed at İSTON

01

New designs

Concepts developed at Urbaniture for young people, families, mobility and resilient cities.

01

DISASTER-RESPONSIVE URBAN FURNITURE

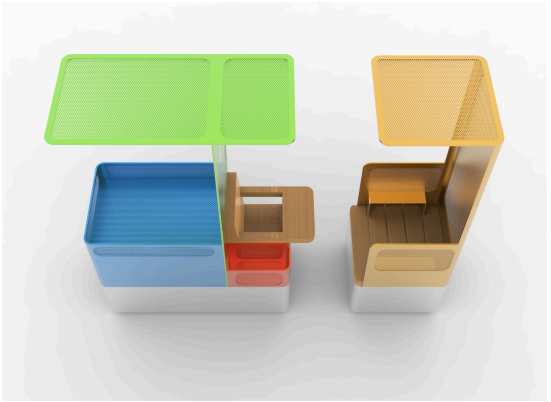

OTAK

In everyday use, OTAK is a social seating unit for young people, with a table, backrests and a charging point. In an emergency, its integrated storage and deployable tarpaulin are intended to turn the frame into a temporary sheltered space for up to four people.

Footprint	240 × 240 cm
Materials	Wood, concrete, metal
Status	Concept design

02

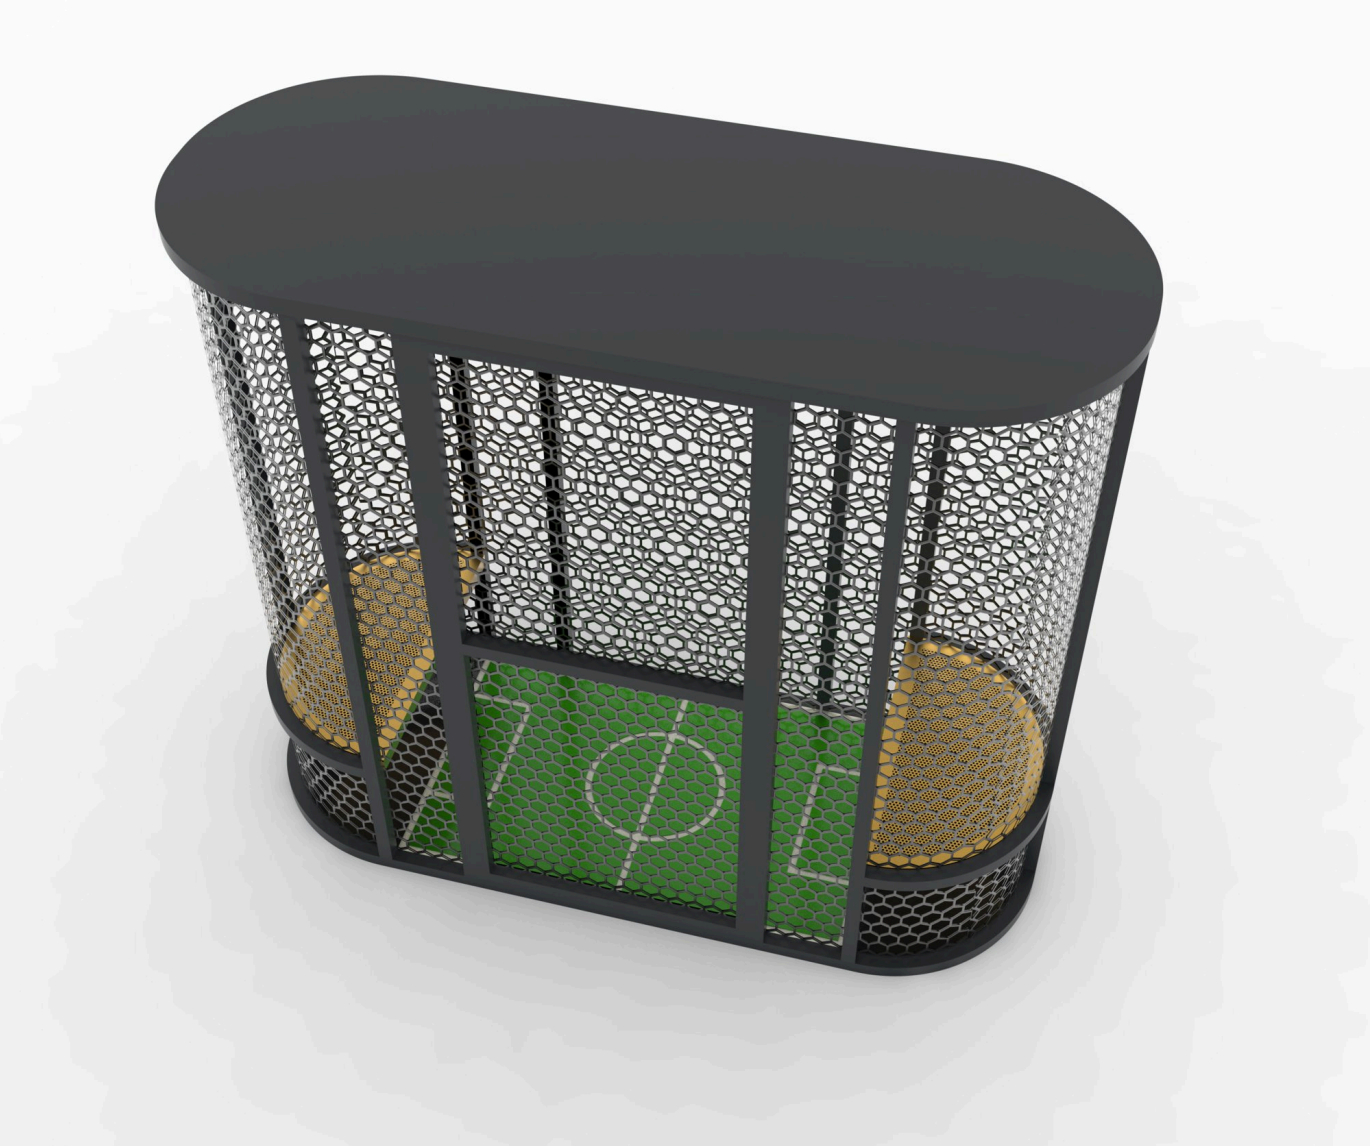

FAMILY INFRASTRUCTURE

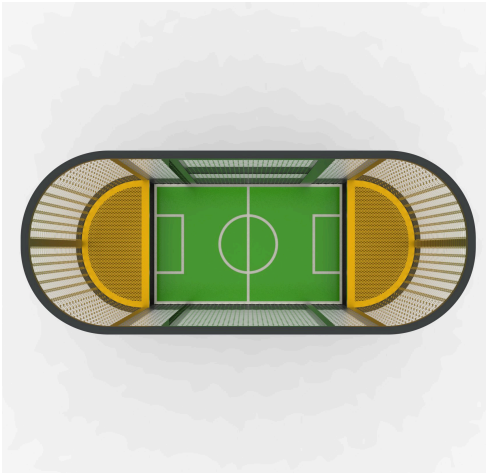

Baby Care Unit

The Baby Care Unit brings essential childcare functions into public space. Combining a changing area, high chair, breastfeeding space, storage and a food preparation surface, it is designed to make everyday outings easier for parents and caregivers.

Dimensions	120 × 60 × 185 cm
Materials	Wood, concrete, metal
Functions	Changing, feeding, high chair, diaper pail

03

PLAY

Cageball

Open the door, step inside and play. Cageball introduces a compact football experience to parks and public squares. The metal frame is enclosed with mesh; the floor can be artificial grass or a painted surface.

Dimensions	228 × 92 × 208 cm
Materials	Metal, polyethylene
Use	Compact football play

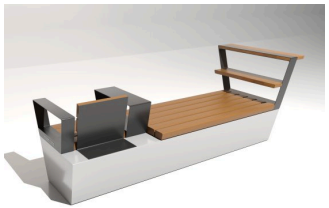

Cageball In a city park. Visualisation.

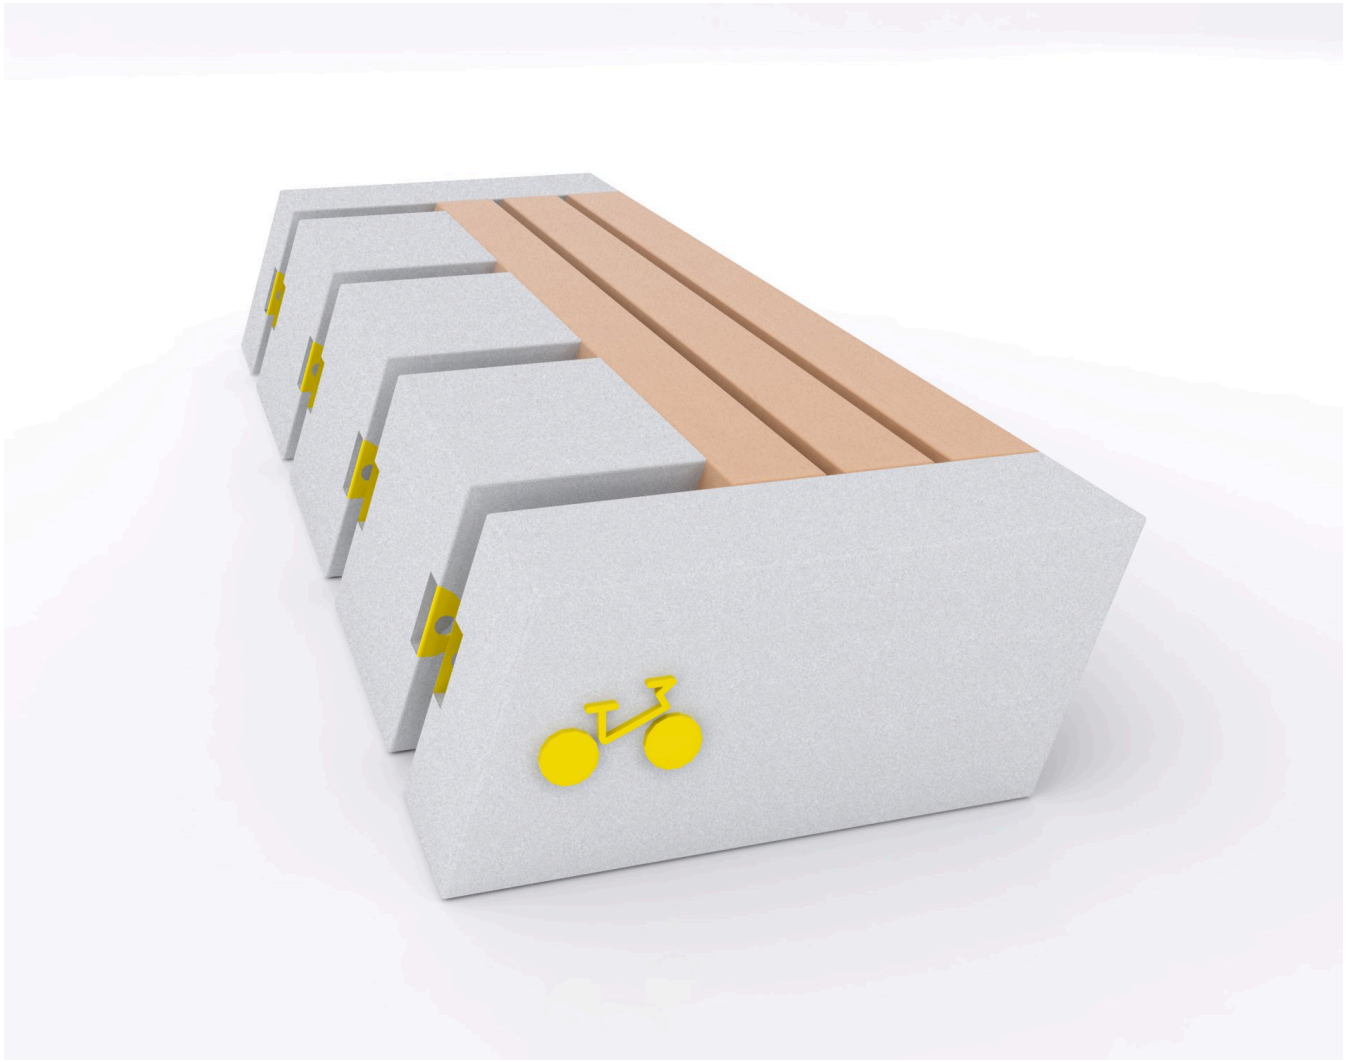

SEATING + BICYCLE PARKING

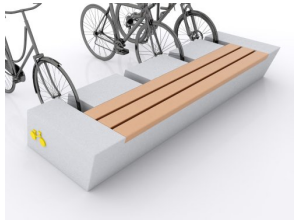

Maya

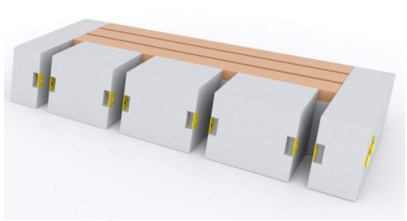

Part of the Urbanovita series. Multiple seating positions facing different directions, a single module with backrest and armrests, and surfaces for a phone, coffee or laptop. Bicycle parking on one side supports active mobility; modules can be added or removed.

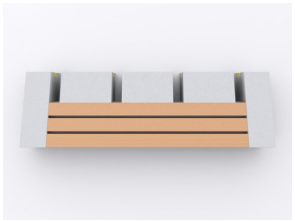

Materials	Wood, concrete, metal
System	Modular, expandable
Series	Urbanovita

SEATING + BICYCLE PARKING

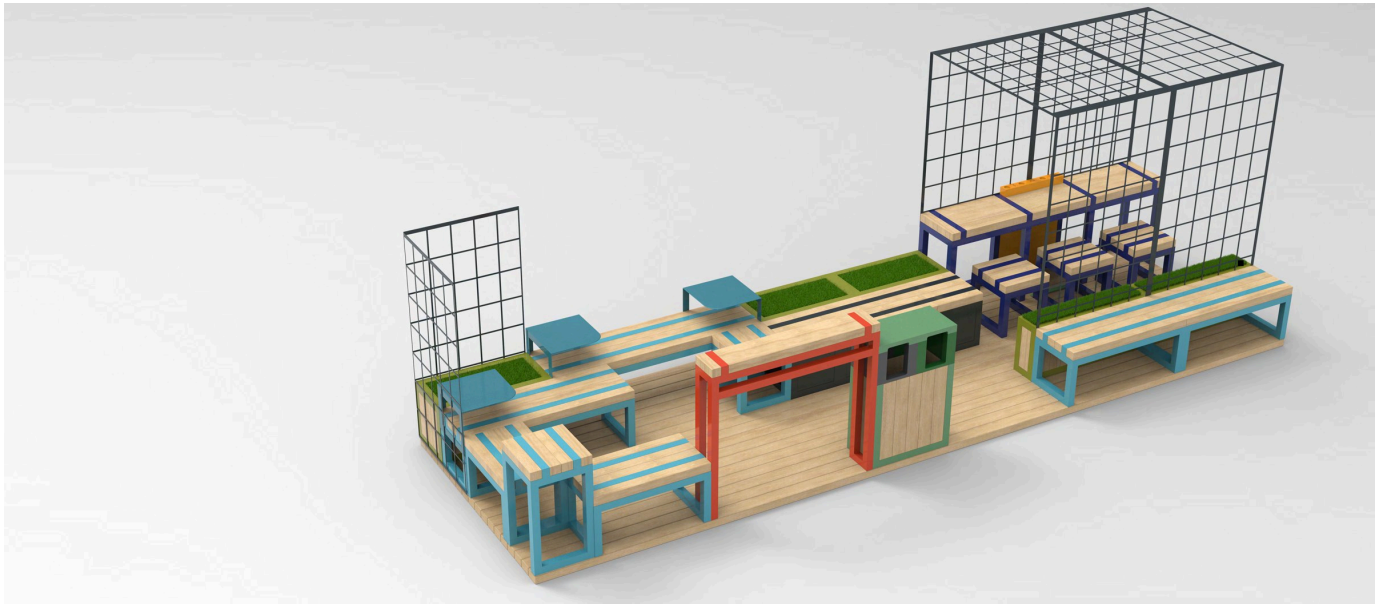

Velospit

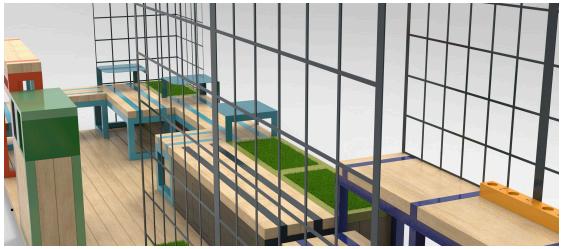

Integrates bicycle parking with public seating. Wooden seating sits on one side of the concrete body, metal locking points on the other. The rhombus form guides users to the bicycle parking; the bicycle mark on the sides raises awareness.

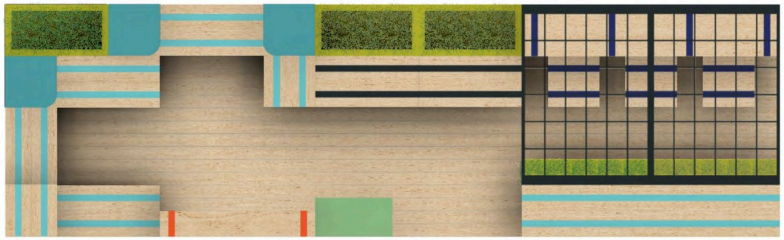

Length	240 cm
Capacity	5 seats · 4 bicycles
Materials	Wood, concrete, metal

Velospit On an urban plaza. Visualisation.

06

MODULAR PARKLET

Urbaniture Parklet

A modular parklet designed for adaptability, repair and extended use. Seating, tables, planters, bicycle parking, recycling, storage, a work area with power sockets and a climbing-plant grid are interchangeable modules that can be reconfigured on site.

System	Modular, reconfigurable
Modules	Seating, tables, planters, bicycle parking, recycling, storage, work area
Materials	Wood, coloured steel, plants

07

MUSICAL URBAN FURNITURE

Musicastle

A small castle that houses musical instruments and brings sound and rhythm to the street. Musicastle gives people a shared, playful way to make music in public space.

Dimensions	125 × 125 × 200 cm
Materials	Wood
Use	Parks, squares, school routes

08

MODULAR FOOD KIOSK — LINEAR

Tezgah

A multifunctional kiosk system that adapts in size and function to the site and the neighbourhood. It can grow, shrink and switch use — food, retail or services — while adding architectural value to the street.

Dimensions	980 × 560 cm
Materials	Steel structure, aluminium cladding
System	Expandable, modular

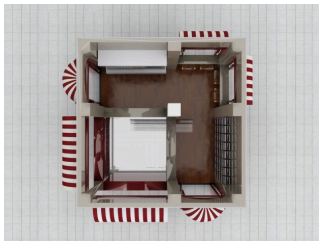

Tezgah As a food kiosk on a city square. Visualisation.

MODULAR FOOD KIOSK — SQUARE

Tezgah Square

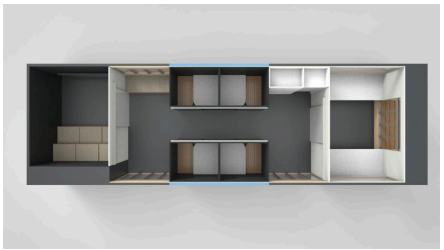

The square version of the Tezgah system for plazas and corners. Four open sides with awnings serve customers from every direction, and the plan can be adapted to different uses and numbers of operators.

Dimensions	450 × 450 cm
Materials	Steel structure, aluminium cladding
System	Expandable, modular

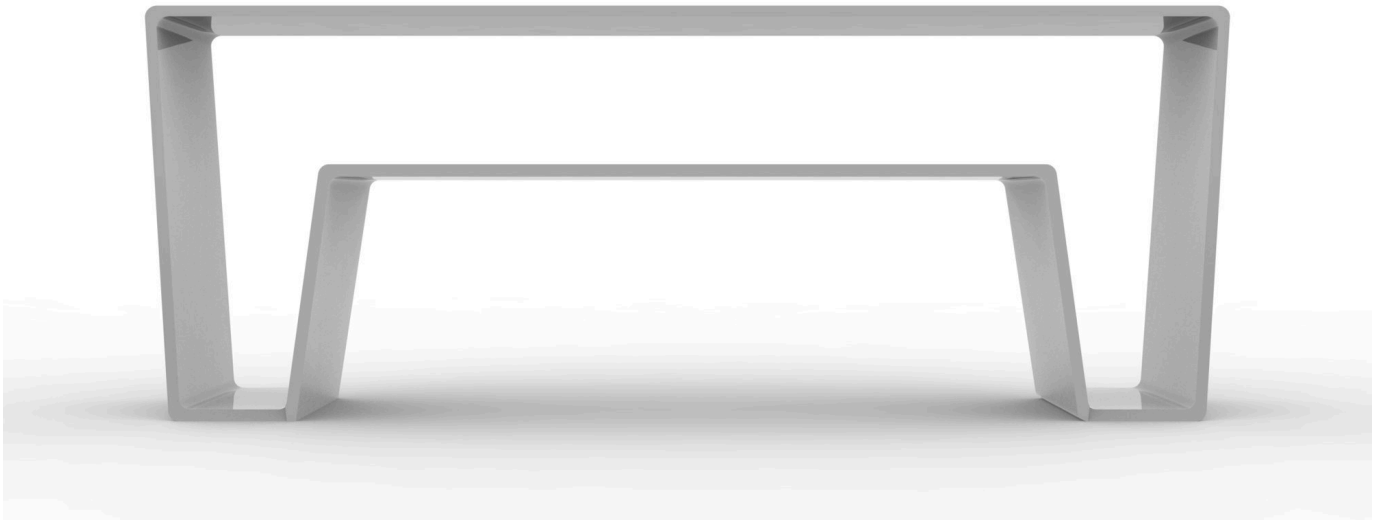

10

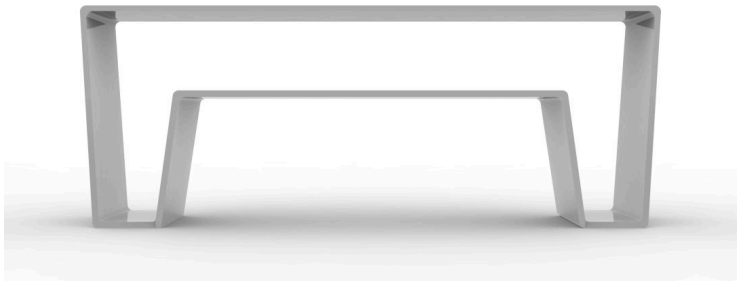

CO-WORKING UNIT

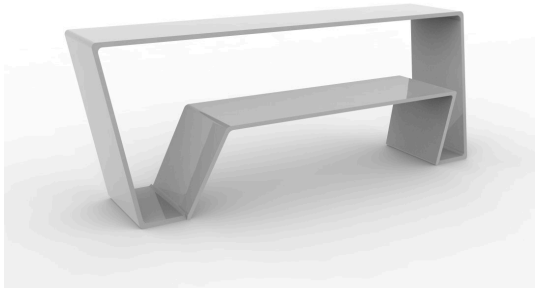

Urbanowork

Designed for young people in the earthquake zone who lost their places to work. One unit provides a range of workspaces for up to 20 users: a presentation room for 8–10, two video-call booths, a meeting unit for two, a closed office, co-working for six, a rest area and a mini kitchen.

Length	8.5 m
Capacity	20 people
Materials	Steel structure, aluminium cladding

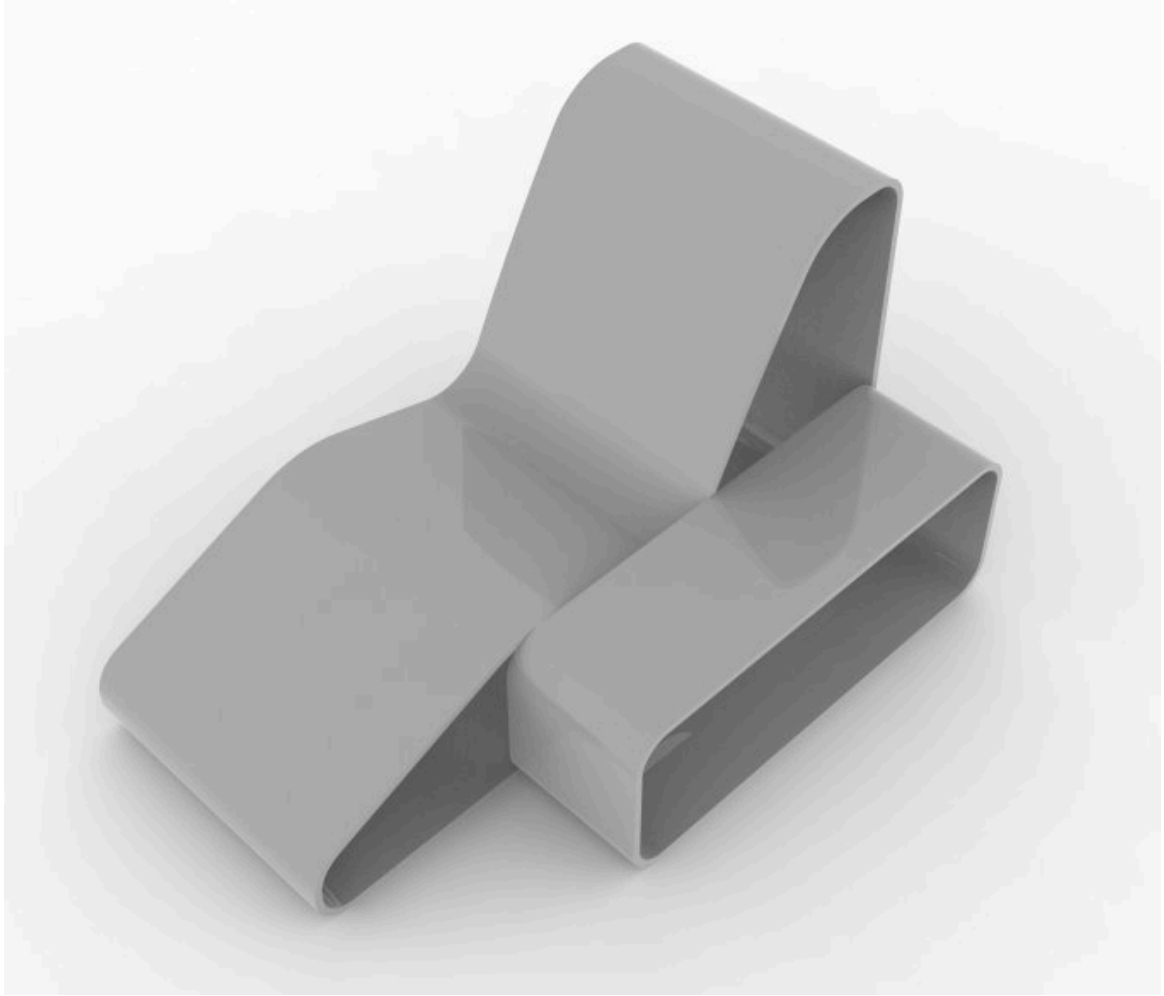

11

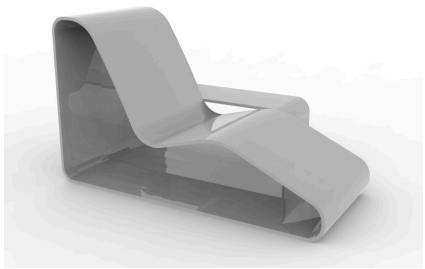

UHPC TABLE WITH SEATING

UltraForma

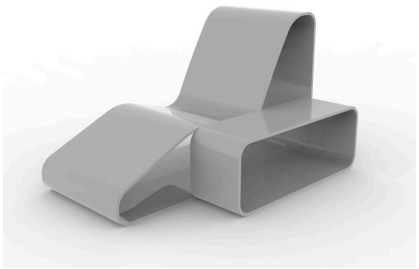

A table with integrated seating in ultra-high-performance concrete (UHPC). The material's strength makes the slender, cantilevered profile possible — a lightness that conventional concrete cannot achieve at this scale.

Material	UHPC
Use	Parks, plazas, campuses

12

UHPC LOUNGER

SunBed

A lounger in UHPC. A single folded surface follows the body from backrest to footrest; the material allows thin sections and a continuous form that suit promenades, resorts and public areas.

Material	UHPC
Use	Waterfronts, resorts, parks

YOUTH FURNITURE · COLLABORATION

Torus

An urban furniture piece that helps teenagers and young adults socialise and spend more time outdoors. Different resting surfaces support both being together and being alone; charging points serve phones and e-scooters, and the ring form adapts with planters and seating modules.

Design	Sinem Buse Yılmaz
Context	Graduation project developed in collaboration with Urbaniture, Eskişehir Technical University, 2021

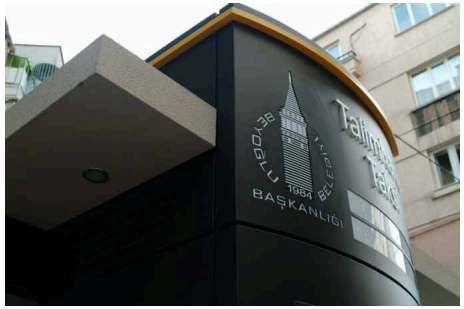

02

Work at İSTON

Projects designed by Mustafa Emre Gözleveli during 13 years at İSTON, Istanbul's municipal urban furniture company. Selected designs from the professional practice of Urbaniture's design lead — not Urbaniture products. Many were manufactured and installed across Istanbul; each page states its status.

MULTI-FUNCTIONAL URBAN FURNITURE

Taxi Stand

A multifunctional taxi stand that combines a sheltered waiting area for drivers with public-facing services. An integrated ATM, kiosk and advertising spaces create potential revenue streams that can help offset installation and operating costs.

Functions	Taxi stop, driver shelter, ATM, kiosk, toilet, advertising
Status	Manufactured & installed

15

LANDMARK SHELTER

Bus Stop

A minimal, efficient shelter with seating, a city clock, digital display and advertising. Its column and clock make the stop recognisable from a distance — by day and at night.

Functions	Shelter, seating, city clock, display, advertising
Status	Manufactured & installed

16

SMART KIOSK

Seren Kiosk

A sail-like form that marks its place in the city. Seren combines smart technology with a compact footprint to offer services and information in parks and on waterfronts.

Type	Smart kiosk
Status	Manufactured & installed

THEMED PLAYGROUND

Sunken Ship

A shipwreck that invites adventure. Climbing structures, slides, swings, rope nets and interactive elements build balance, coordination and strength, made from durable, natural materials.

Elements	Slides, swing, rope net, climbing
Status	Manufactured & installed

SECURITY KIOSK

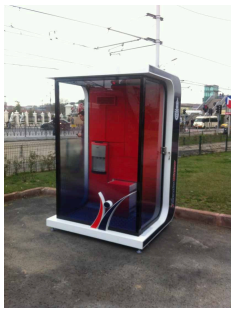

İBB Kiosk

A security booth for Istanbul Metropolitan Municipality. Large glass surfaces give a wide viewing angle for monitoring the surroundings, while the spacious interior offers a comfortable, well-equipped workplace.

Client	Istanbul Metropolitan Municipality
Status	Manufactured & installed

19

TRAM STOP KIOSK

Ulaşım A.Ş. Kiosk

Found at tram stops across Istanbul, this kiosk fits maximum function into minimum space. Handle-free storage cabinets with push-to-open mechanisms keep the interior practical and the corporate identity clear.

Client	Ulaşım A.Ş., Istanbul
Status	Manufactured & installed

SEATING UNIT + PLANTERS

Lipso Bench

Seating nestled between elliptical planters. Greenery frames a calm retreat inside the urban landscape — a multifunctional element that works as both bench and garden.

Functions	Seating, planter
Status	Manufactured & installed

21

SEATING UNIT

Yay Bench

A bench with a distinctive curved profile: the curved wooden slats allow many different ways of sitting, leaning and lying on a single piece.

Materials	Concrete, wood
Status	Design completed

22

SEATING UNIT + PLANTER

Divan Bench

A double-use bench that combines seating with a planter. The perforated concrete screen gives shelter and privacy while greenery grows behind it.

Functions	Seating, planter, screen
Status	Design completed

MODULAR SEATING SYSTEM

İstanbul Bench

Three modules — seat, backrest/planter and platform — combine into more than ten configurations. Concrete, metal and wood come together in a form inspired by Istanbul's two continents and the Bosphorus that connects them.

System	10+ products from 3 modules
Materials	Concrete, metal, wood
Status	Design completed

DOUBLE-SIDED SEATING

Emirgan Bench

Two ways to sit on one bench: a lower upright seat on one side and a reclined backrest on the other, adapting to different sitting preferences along the shore.

Materials	Concrete, wood
Status	Design completed

LITTER BIN

Emirgan Litter Bin

An elegant litter bin in concrete and metal with an integrated cigarette disposal area on top. A clean, minimal form that belongs to the Emirgan family.

Materials	Concrete, metal
Status	Design completed

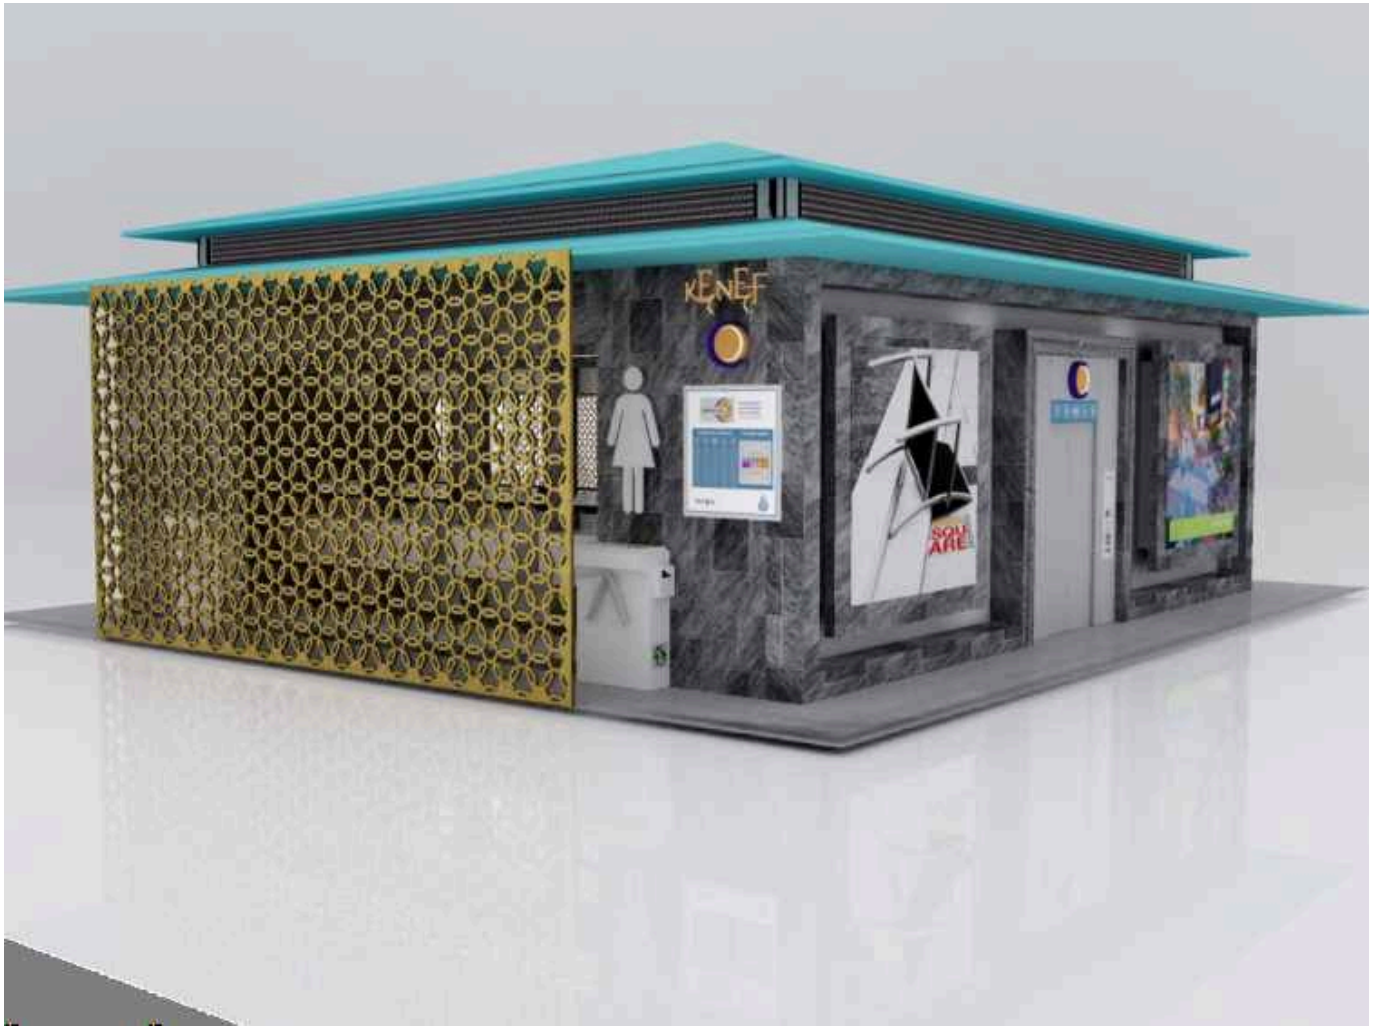

DOUBLE-SIDED SEATING

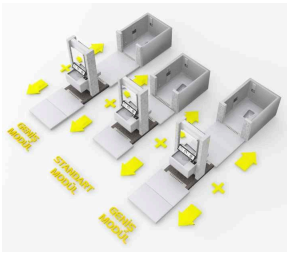

Tarabya Bench

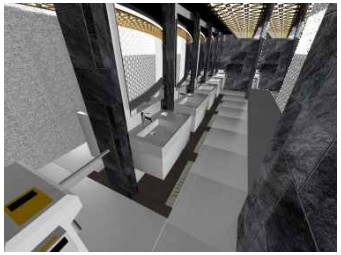

One side offers a relaxed, reclined position for stretching out; the other a standard upright seat. Made for reading, enjoying the view or simply unwinding.

Materials	Concrete, wood
Status	Concept developed at İSTON

AUTOMATED SELF-CLEANING TOILET

Public Toilet

A modular public toilet concept with separate spaces for women, men and people with disabilities. Touch-free fittings and an automated cleaning system are designed to support hygiene and simplify maintenance.

System	Modular, automated cleaning
Access	Women, men, people with disabilities
Status	Design completed · Registered design

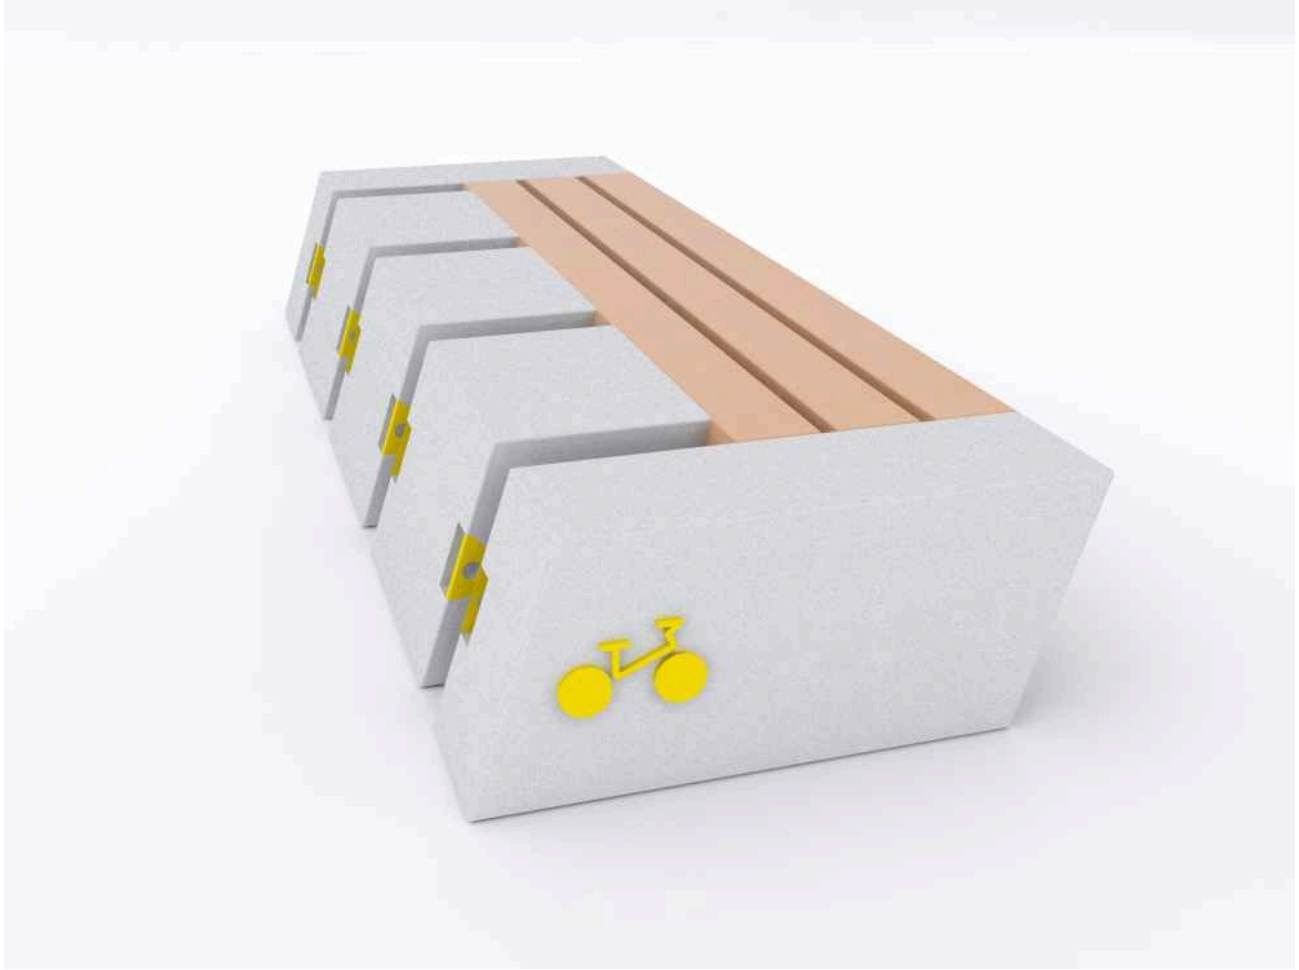

PUBLIC TOILET

Public Toilet — Iconic

An iconic version with a glazed entrance and a perforated metal screen. The façade turns a service building into a recognisable object in the park.

Materials	Glass, perforated metal
Status	Design completed · Registered design

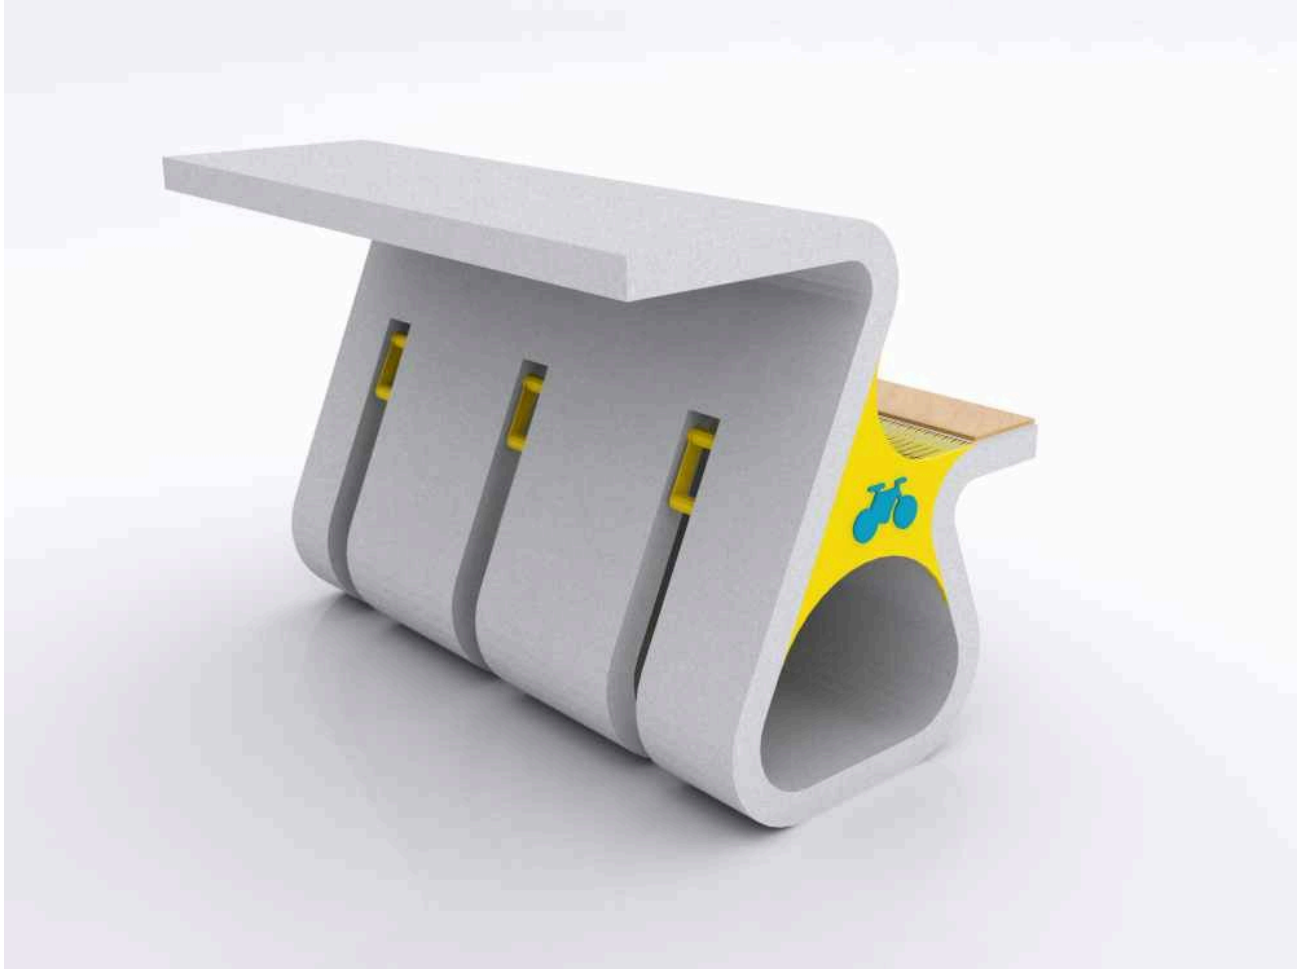

DOUBLE-SIDED, WITH SEATING

Bike Rack

A concrete body with wooden seating on top and locking points on both sides. Parking and resting in one compact object.

Materials	Concrete, wood, metal
Status	Concept developed at İSTON

30

DOUBLE-SIDED, WITH RAISED TABLE

Bike Rack — Table

An iconic loop in concrete that combines bike parking on both sides with a raised table surface and seating.

Materials	Concrete, wood, metal
Status	Concept developed at İSTON

SERVICES

From a single bench to a city-wide furniture system.

Urbaniture works with municipalities, architects, landscape architects, developers and manufacturers — joining a project at concept stage or bringing an existing brief to production.

Urban furniture design

Original products from concept development to production-ready drawings: benches, kiosks, shelters, play and street elements.

Modular systems & customisation

Product families for manufacturers and project-specific adaptations of existing lines for cities and developers.

User research & participatory design

Surveys, needs analysis and inclusive participation processes that show what users actually need.

Design consultancy & integration

Product strategy, technical design reviews and support integrating furniture into architecture, landscape and competition projects.
